Career Objective

Undergraduate 3rd-year Electronics and Communication Engineering student with strong programming skills in Python, C, and SQL. Seeking an internship in networking and software testing to contribute by validating and improving scalable solutions, security testing platforms and networking fundamentals to ensure reliability and efficiency.

Education

Pragati Engineering College

B.Tech, Electronics and Communication Engineering — CGPA: 8.96/10

Kakinada, Andhra Pradesh

2023 – present

Narayana Jr. College

Intermediate (MPC) — Percentage: 97.3%

kakinada

2021 – 2023

Sadhana high school

Secondary School Certificate (SSC)

kakinada

Completed: 2021

Internships & Projects

1M1B Green Internship

- Worked on Sustainability-Focused tasks involving research, Documentation and solution planning.

Automatic Tollgate System using Arduino

- Designed and implemented an automated tollgate solution using Arduino microcontrollers, enhancing efficiency and safety by eliminating manual intervention.

Aarogya Mithra | Smart India Hackathon Project

- Developed a healthcare solution for migrated workers in Kerala, focusing on accessibility and professional documentation.
- Collaborated with a team to design and showcase the project, ensuring visibility through GitHub

Skills

Technical: Python, C, Verilog HDL

Tools: Wireshark, VS Code, EDA playground

Languages: English, Telugu, Hindi

Certifications

- Salesforce Agentforce - Salesforce
- Cisco Python Essentials 1, 2 — Cisco Networking Academy
- Quantum Computing — NPTEL
- Software programmer python-council for skills and competencies

Strengths

Quick adaptation to new technologies and fast-changing environments.

Strong analytical and problem-solving skills, especially in coding and embedded systems.
