Career Objective

Electronics and Communication Engineering student (CGPA 8.96/10) with hands-on experience in Python, FastAPI, SQL, Verilog HDL, and IoT development. Built full-stack backend applications, implemented JWT authentication, and developed hardware-based projects using Arduino and Verilog. Solved 200+ LeetCode problems and actively seeking Software Development, Embedded Systems, or QA internships.

Education

Pragati Engineering College

B.Tech, Electronics and Communication Engineering — CGPA: 8.94/10

Kakinada, Andhra Pradesh

2023 – present

Narayana Jr. College

Intermediate (MPC) — Percentage: 97.3%

Kakinada

2021 – 2023

Sadhana high school

Secondary School Certificate (SSC)

Kakinada

Completed: 2021

Internships

1M1B Green Internship

- Worked on Sustainability-Focused tasks involving research, Documentation and solution planning
- Collaborated on sustainability-focused projects and environmental impact assessments.

Info Bharat Interns (IBI) internship -BHARAT

- Developed a Python-based Gym Management & Fitness Analytics System using **FastAPI**, **SQLite**, **Pandas**, and **NumPy**.
- Implemented JWT authentication, workout tracking, attendance monitoring, analytics dashboards, and data visualization features

Projects

Electronic Voting Machine (EVM) Design Using Verilog HDL

- Designed and simulated a secure **Electronic Voting Machine** using **Verilog HDL**.
- Implemented modules for voter authentication, candidate selection, vote counting, and result generation.

IoT-Based Sensor Array System for Ayurvedic Medicinal Leaf Plant Detection

- Developed an **Arduino-based IoT system** for Ayurvedic plant monitoring using multiple sensors.
- Integrated sensor data with a **real-time dashboard** for visualization and improving monitoring accuracy.

E-Commerce Web Application

- Developed a full-stack **E-Commerce Web Application** using **FastAPI**, **SQLite**, and **SQLAlchemy** with a modular backend architecture.
- Designed RESTful APIs for product, user, cart, and order operations with input validation using **Pydantic**.
- Integrated responsive frontend templates with backend services and optimized database operations for efficient data retrieval.

Skills

- **Technical Skills:** Python, C, Verilog HDL , SQL , FastAPI
- **Tools:** VS Code, GitHub , EDA Playground, Arduino IDE , Tinker Cad
- **Soft Skills:** Leadership , Communication, Teamwork
- **Languages:** English, Telugu, Hindi

Certifications

- Salesforce Agentforce - Salesforce
- Cisco Python Essentials 1, 2 — Cisco Networking Academy
- Quantum Computing — NPTEL
- Software Programmer Python-council for skills and competencies

Achievements

- Solved 200+ LeetCode problems
- Participated in Smart India Hackathon
- Maintained a CGPA of 8.94/10 in B.Tech

Strengths

- Quick adaptation to new technologies and fast-changing environments.
- Strong analytical and problem-solving skills, especially in coding and embedded systems.
